

Care instructions and cleaning instructions for extremely matt Queenply acrylic decors

If you think that one of our extremely matt, velvety Queenply acrylic decors suits you and your camper, we are very happy! This lightweight panel is really a noble piece. So that the high quality of the acrylic decor – especially the deep matt impression – is maintained over a long period of time, you should read care and cleaning instructions:

- Do not use any aggressive cleaning agents, especially those containing solvents or grease. Simply water or diluted soapy water is ideal.
- Please do not use furniture polish or other wax-based cleaners. They can leave a sticky surface and destroy the matt impression.
- Please keep your hands off abrasive cleaning agents or scouring powders, as these will permanently damage the surface.
- Therefore, please do not use steel wool, hard cleaning sponges, pot cleaners or similar on this panel.
- Soft cleaning cloths, for example cotton cloths or soft sponges, are ideal for cleaning. However, please only use cloths that have been cleaned beforehand, so that there is no dirt from other cleaning areas, which could scratch the velvety matt surface. It is best to wash the cloths/sponges at 60 degrees before use.
- Remove stains as quickly as possible, as this makes them much easier to remove.
- Never use a steam cleaner.
- To prevent electrostatic build-up of dust particles or suspended matter from the ambient air, you can regularly wipe the surfaces with a well-moistened cotton cloth, applying gentle pressure. Simply dry the remaining water film on the plate (do not rub dry).
